

Why General Contractors should always subcontract access floors to Comp-Utility

We are an authorized distributor and installer of Computer Environments Inc. Access Flooring. For nearly three decades Computer Environments Inc. has been successful in providing our clients with access flooring. Consideration is justified for the following reasons:

1. Our reference list includes some of the most prominent users in the industry.
2. CEI's product line covers virtually every application.
3. Freight cost is very low. Manufactured in Texas, by Texans.
4. Factory stock is typically 20,000 square feet.
5. Comp-Utility employs a former CEI factory engineer with 12 years experience in the design, installation and application of access flooring and computer room related products.
6. We have experience covering thousands of individual jobs.
7. We directly supervise each installation, installers are trained to strict standards.
8. We are available 7 days a week, 24 hours a day.
9. We participate in the Construction Safety and Health training program in addition to a written drug testing program.
10. Most of our business is repeat business.

We are also members of the Austin Chambers of Commerce, CATA, CTLA and produce a charity benefit each year for various causes. On behalf of all of us at Comp-Utility, we appreciate the opportunity to serve you.

Randall P. Collier, P.E.
President
