

# Comp-Utility Corporation

## Turnkey Solution

CUC employs a full-time Registered Professional Engineer with twelve years experience in selecting, designing and installing the components represented in the CUC product line. Whether you are designing a new site or upgrading an existing one, CUC provides the correct equipment selection and can guide you right through plans and specifications. CUC can also provide written technical reports for project justifications.

CUC employs project managers who are responsible for ensuring complete client satisfaction. These client-oriented professionals act as the client's advocate, interfacing with CUC management, it's manufacturer's and installation crafts. This puts an expert in your pocket for resolving any site issues effectively and expeditiously.

Whether you are considering a complete facility, a UPS, or storage requirements – CUC offers the complete turnkey solution. The best way to see how CUC can solve all of your facility needs is to [request a site survey](#).
