**Subject:** Many Thanks from Cedar Park Public Safety Communications Division

This week saw the tear down of the old Comm Center furniture and equipment and the installation of our new furniture from Xybix as part of a grant funded project.

A very large group of people worked together to make this possible and I want to make sure you're all aware of how much I appreciate everything that has been done to allow this project to come to successful completion.

Thank you to:

Kimberly Painter for your work on the grant application that allowed us to move forward with this project.

Scott Parker, Terry Purvis, and all the team at Williamson County Emergency Communications for allowing us to set up shop in your center during this project.

Randy, Devin, and the team at CAPCOG and Solacom for your work in helping us get set up at Wilco and here at our PSAP.

The team at Comp Utility for your work on the electrical and data requirements for our CAD and radio equipment and also to the team from Richards Electric for the same work on the 9-1-1 side.

Steve and Alan with RZ Communications for assisting with tear down and reinstallation of the radio equipment.

John and Dan with AT&T for their work on tear down and reinstallation of the 9-1-1 equipment.

Steve and Brad with the city's Facilities department for their work in tear down and furniture and equipment removal.

Pretty much the entire Cedar Park Information Services team for all their work with tear down, reinstall, and setting up our remote access from Williamson County.

Dale and Carlton with Xybix for their excellent work installing the new furniture.

Chief Mannix, Chief Mallinger, and the PD and FD Command Staff teams for their support of this project.

FD and PD for their patience over the past week while we were in modified operations.

The Cedar Park Public Safety Communications Divisions Dispatchers and Supervisors for their flexibility, efforts, and excellent work.

Without the cooperation and work of even one of these groups during this week, we wouldn't be at the point we're at today. We still have a few folks in helping with final touches to get all our positions fully operational but our new Comm Center furniture is really awesome and all our staff are really excited to be on modern consoles.

Thank you, all, again, very much for your cooperation and assistance throughout this project. If you haven't had a chance to see our new set up, I encourage you to come visit when you have the time.
